

Welcome To Dive File Software Version 1.01 For Handhelds

The software is easy to use and helps travelers keep information organized for trips and also pass some time during travel times.

A.) **Installation/Start**

Hot Synch DiveFile.prc to your Handheld, and launch Dive File by pressing on the icon.

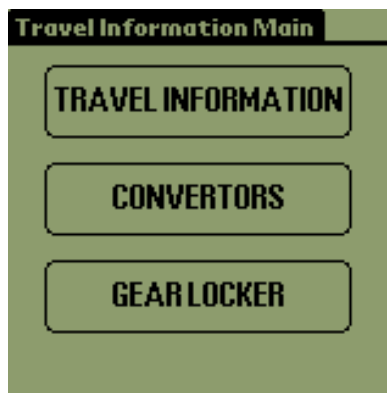

B.) **Main Menu**

When Dive File starts you will see the Welcome Screen, where you can press a button a jump to the main travel section or games section. You can also use the menu to jump to any other section in Dive File

C.) **Travel Planning And Tools**

The tools section consists of three tools. Convertors for some metric conversions, and certain diving related conversions. Trips, where you can enter information for your trips, such as airline reservations, and the Gear Locker, where you can make a “packing list” and store information for items, such as serial numbers and contact information for the manufacturer of a product, or other information you would like to have while traveling.

1.) Travel Information

When you first start the travel section you will see a screen, which list all of your trips (if you have no trips entered, the screen will be blank). The first thing to do is enter a trip, and from there you will be able to enter more details. So press Add Trip to go to the enter screen.
